

CONSERVATION IN ACTION:

An In-depth Exploration of Madagascar with world-renowned lemur expert, Dr. Ian Tattersall **August 10-21, 2014**

Dr. Ian Tattersall, is a world-renowned paleoanthropologist and a leading authority on primate research. He has been studying lemurs since 1969 and is recognized for his discovery of the golden-crowned sifaka lemur, also known as Tattersall's sifaka, in northeast Madagascar in 1974. He has published more than a dozen books on the theories of human evolution and is also Curator Emeritus for the Division of Anthropology for the American Museum of Natural History. As your guide, Dr. Tattersall will share his extensive knowledge, making this trip truly a 'once in a lifetime' experience. [More about Dr.Tattersall](#)

- Spend four days exploring this unique area where ocean meets forest

Read about how the magical country of Madagascar enchanted one of EXPLORE's own:

Madagascar was never very high up on my list of "must see" places... It just wasn't on my radar. I'm not sure why- I suppose I just didn't know how fascinating this unique country really is. But that was a huge mistake. It is a wild and mystical and beautiful country. It isn't Africa, it isn't Asia, and it isn't anything like anywhere else on earth. It is a unique and strange and very friendly place. It is definitely a MUST see destination for the intrepid traveler.
